RE: Inspection of Strawberry River Quarry on March 27, 2008

Dear Mr. Read:

An inspection of the Strawberry River Quarry operated by Rock & Stone LLC was conducted on March 27, 2008 to determine if the operation was being conducted in accordance with the Conditional Use Permit issued by the Duchesne County Planning Commission on April 3, 2002.

The conditions of approval were are follows:

1. Maintain a clean work site. *Finding: The enclosed photos show old tires, barrels and scattered posts or poles on the site that detract from the cleanliness of the site. These items must be removed from view of the county road immediately. If the CAT track-hoe (#EL24OC) is not in operable condition, it also must be removed.*
2. Comply with all State regulations. *Findings: DOGM has reported no problems.*
3. Notify all residents within one mile before any blasting. *Findings: The County has received no complaints regarding blasting.*
4. Limit hauling on Strawberry River Road to times when it is dry enough to avoid damage to the road. *Findings: The photos show that, with the Spring thaw, mud is present. Additional rock must be applied to loading and equipment maneuvering areas so that mud is not tracked onto the county road. Coordinate placement of rock on the county road with Glen Murphy, County Road Supervisor, 435-738-2468 so that the road remains passable.*

The photos indicate that a tractor-trailer rig was parked parallel to the county road (on the south side) and the county road is being used for loading of trailers. This practice must be changed so that loader equipment maneuvering does not block, hinder or interfere with public travel on the road.

Please give these matters your immediate attention and contact me when you are ready for a re-inspection.
